(1 point)

1. Your friend is overweight and needs to be fit (Give advice)

You :

2. You want to go to Al Aqsa hospital. (Ask for direction)

You :

Reading (10 marks)

1-Read the passage then answer the questions

So you're in Grade 10, a year of hard work and important choices. Should you take the academic route? Or should you follow the vocational route to become a carpenter or a nurse perhaps? If you lived in Germany or France, things would be organized differently. **There**, you would continue with most of your subjects until you graduated. However, the Palestinian system offers choices, and **these** must match your interests and abilities. If you choose the right group of subjects, they'll carry you towards the right career. Choose badly, and you'll become bored and do badly. With careful thinking, that shouldn't happen. If it did, you might leave school with weak qualifications and a future in a 'dead-end' job. It would be a disaster! So start thinking now. Some people may say you should become a doctor or an engineer because they are 'good' jobs. Don't listen. A job will only be good if it is right for you! And remember this: people are respected if they do their work well - whatever their jobs.

A) Answer the following questions:

(3 points)

1-Why is grade 10 difficult for students?

2-What are the two routes that the text discusses?

3-What might happen without careful thinking?
