**D-Reading**

**(8 Marks )**

Read the following passage then answer the questions:

Your body is like a car. Cars need fuel - and we need food. Your body uses most of yesterday's supply by morning and then it needs more. People who forget this and miss breakfast may suffer headaches, and **they** will certainly be low on energy. On the other hand, scientists say, people who eat a proper breakfast learn better, behave better and are generally healthier. Moreover, people who miss breakfast are especially likely to make up for it later with large portions of things that contain lots of unhealthy fat and calories - a burger perhaps or a pie and some fries. Not surprisingly, 17% of American teenagers are now very overweight. Dangerous "killer" conditions often follow in later life - heart disease, for example. The answer is to eat a healthy breakfast and a balanced daily diet that gives our bodies the nutrients that they need. And of course to get more exercise.
